

TKC-CLEANER Clean Makes Precision

Clean where you forgot to clean

It is very difficult to remove oil and chips stuck to clamping bores, even with a wiping cloth or air-spray. TKC Cleaner perfectly cleans the clamping bore of a tool holder in a very simple manner. TKC Cleaner maintains the high performance of tool holders.

Twin-piece cleaner with fleece strips

Size \varnothing 13 - 42mm

Part No.	Description	Cleaning Length
TKC13	\varnothing 13mm Bore Cleaner	2.362"

All specifications subject to change without notice

The following pictures show the application of a twin-piece cleaner in the cylindrical clamping bore of a tool holder:

1. Insertion position

Push thumb-piece forward to reduce diameter and insert cleaner into bore.

2. Cleaning operation

Engage tool holder bore by releasing the thumb-piece, manually turn the cleaner 360° degrees, then withdraw.

3. Variety of sizes

For different cylindrical bore applications.
